Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

1. Claim 1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Because the phrase "the consumers of the second group, a noticeable feedback to the primary energy memory does not occur even while it is being loaded by consumers group of the second group." is confusing and not clear. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Objections

2. Claims 1-12 are objected to because of the following informalities: The transition phrase "Characterized in that" should be replaced by "consisting", "comprising", "including" or similar other transition phrase. Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

4. A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art

Art Unit: 2838

are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jungreis et al. (U.S. Patent # 6,369,461) in combination with Powell et al. (U.S. Patent # 4,719,550) and further in combination with De Doncker et al. (U.S. Patent # 5,373,195). As best understood Jungreis et al. disclose the claimed invention switching system (figure 1-2), including a power-limiting primary energy memory (figure 1, item 22), a voltage converter (figure 1, item 12), a current limiting unit (figure 1, item 24). Jungreis et al. does not disclose the utilization of the technique for a secondary energy memory for high-powered consumer, a transformer and voltage detection, monitoring device. Powell et al. teaches the utilization of the similar technique for a secondary energy memory for high-powered consumer (figure 4, item 108) and De Doncker et al. teaches the utilization of the similar technique for voltage detection and monitoring device (figure 2, item 44, 36 and 46). It would have been obvious one having an ordinary skill in the art at the time the invention was made to modify Jungreis et al.'s power supply by utilizing the technique taught by Powell et al. and De Doncker et al. for the purpose of increasing efficiency of the power supply.
